Overview

Overview

There are so many challenges that come with finding a good, local pet sitter. You need to find someone both you and your pet trust.

With our management system, these problems will be resolved. Our goal is to make it as easy as possible for you to schedule and receive pet care.

Our system assists user to explore options such as locating a veterinary doctor for pets, providing pet foods and accessories, helps finding care-taker for pets and importantly provides best adoption option for the pets.

Pet Veterinary

- Pet Veterinary is an enterprise which has hospital organization as its organization.
- Hospital organization has 2 roles viz. Doctor and Hospital Admin.
- Doctor helps to view encounters and leave the vital signs whereas Hospital Admin helps to add/view hospitals and add/view the doctors.

A man in a white lab coat is holding a golden retriever's paw. The dog is looking up at him. The background is blurred.
